SCT International, LLC Announces Issuance of *Sekuweb*™ Patent

ATLANTA, GA- June 15, 2009- SCT International, LLC (“SCT”) - an anti-counterfeiting solutions provider focused on commercial brand protection and government revenue and document protection - announced today the issuance by the U.S. Patent and Trademark Office of Patent No. 7,542,175 on June 2, 2009 to Sekuworks, LLC, a wholly owned subsidiary of SCT. The newly issued patent covers the *Sekuweb*™ Secure Document Print System, a world-class innovation that combines flexographic, rotary screen and foil stamping with multi-color intaglio in a roll to roll web format. The system includes modular components for unique configurations and flexibility to meet today’s multi-layered print requirements. The *Sekuweb*™ method for the production of complex, multi-layered security products, perhaps the fastest, most efficient, and cost effective print system known to exist today, forms the cornerstone of the Sekuworks product integration and delivery platform.

The proprietary technology of the *Sekuweb*™ was developed by Mr. Joseph Schutte III, Sekuworks founder and Chief Technology Officer, following his years of experience in working with major government operations, including the U.S. Bureau of Printing and Engraving, the Banque de France and the Bank of England. Said Mr. Schutte, “I wanted to leverage the strong security of intaglio printing by combining it with flexography to produce high value security documents and brand protection solutions.” He added, “This is the first system designed to produce intaglio printed labels in a roll format and marks a paradigm shift for the security printing industry.” Robert W. Spiller, President and Chief Executive Officer of SCT, emphasized, “Intaglio is used to protect the currencies of the world and our roll format now allows the seamless integration of intaglio security to be utilized in the high speed packaging world.”

Anthony J. Butte, Executive Chairman of SCT, commented, “We are extremely pleased in that the issuance of this patent affords us an additional level of intellectual property protection for one of our core security technologies while, at the same time, validates our claims around the unique capabilities of the *Sekuweb*™ Print System.”

About SCT International, LLC

SCT International, LLC, an Atlanta, GA. based holding company, is an anti-counterfeiting solutions provider focused on commercial brand protection and government revenue and security document protection. SCT has emerged as a leading participant in this market by offering its commercial and government customers some of their most innovative anti-counterfeiting solutions.
