**SEKUWORKS NEW LINE OF TAMPER VOID TAPE ELEVATES SECURITY  
WITH MULTI-LEVEL ANTI-COUNTERFEIT FEATURES**

**HARRISON, OH** (May 10, 2010) – Sekuworks, LLC – a leading brand protection and anti-counterfeit solutions company – now offers the SEKULOCK™ line of self wound tamper indicating void tapes that also provides anti-counterfeit and tracking features. The standard line “raises the protection bar” above any other tape products on the market. Custom tapes adding multi-colored graphics and additional security features are available.

SEKULOCK™ self wound poly tape, designed to work with automatic or hand held tape gun dispensers, provides secure container closure and tamper void indication on a wide variety of packaging substrates. The high resolution security print, not available from other security tape products, includes guilloche patterns, visible micro text and covert UV micro text viewable under black light. Alpha / Numeric code aids in documentation of each use and spaced at 9.0” intervals for use as an envelope seal.

“Sekuworks has been providing ultra high security tapes to governments for years,” notes Bob Spiller, Sekuworks President and CEO. “Customers buying our brand protection labels had been telling us that they wanted a higher level security tape than was currently available. They wanted the same security in a tape as their labels and markers manufactured by a NASPO certified company. We met their request!”

SEKULOCK™ standard Tamper Tape is 2.0” wide X 166’ long rolls on 3.0” cores packed in cases of 36 rolls. Custom tapes are made to meet a customer’s needs. The product is available directly from Sekuworks or one of its security partners, including Unisource Worldwide, Inc. and Unisource Global Solutions.

“Most tapes are available on the internet and blindly sold to anyone or simple enough to be duplicated,” Robert Sherwood, Vice President Security Programs Management, points out. “Criminals open, pilfer from boxes and containers, and replace the tamper tape with the exact product to avoid detection. Our anti-counterfeit coded product provides the elevated security tools to deter the bad guys,” he said.
